

Child Development Program Level Student Learning Outcomes

Students completing the Child Development Program will be able to:

1. Demonstrate skills in teaching young children.
2. Follow policies and procedures for health, safety, and nutrition, using universal health precautions.
3. Demonstrate the importance of incorporating a professional code of ethics and participate in professional growth activities.
4. Supervise and directly interact with children using developmentally appropriate guidance skills and problem-solving strategies.
5. Demonstrate appropriate dress and conduct while working in a child development center.
6. Apply appropriate practice in Infant-Toddler and Preschool classrooms.
7. Demonstrate how to observe, document, and assess in order to support young children and families.
8. Develop and provide developmentally appropriate activities in both indoor and outdoor environments.
9. Explain emergency procedures for a child development center.
